

PEOPLE WITH ARPKD NEEDED FOR A LIVER IMAGING RESEARCH STUDY

WHAT ARE THE GOALS OF THIS RESEARCH STUDY?

The purpose of this research study is to learn whether new types of MRI and ultrasound can be used to find out how severely affected the liver is in people with ARPKD.

WHO CAN BE A PART OF THIS STUDY?

- People ages 6 years and older
- Clinical diagnosis of ARPKD
- Ability to lie in an MRI scanner for up to 60 minutes

WHAT WILL PARTICIPANTS BE ASKED TO DO?

Participants will be invited to take part in 4 study visits over approximately 4 years, each lasting about 3 hours. At each visit, participants will have an MRI and ultrasound of their abdomen and a blood draw.

Participants will be compensated for their time and travel.

I WANT TO HELP! WHO DO I CALL?

If you are interested in participating in the study or want to learn more, please contact Dr. Erum Hartung's study team:
